

Care Instructions

Taking care of your Master Roo hat is easy. Follow these simple care instructions to ensure your Master Roo product lasts a lifetime.

Drying

If your Master Roo hat gets wet, dry naturally at room temperature, away from direct sunlight.

Sunlight

Do not store your hat in the rear window of the car as shrinkage may occur.

Storage

When travelling short distances your Master Roo 'Nomad' hat can be stored in the travel bag provided for short periods of time. Simply fold as directed and place in your master Roo travel bag. Be sure not to bend the hat brim. Place in your bag or back pack, ensuring no pressure is put on hat while stored in this way.

Storage when travelling long distances

If your Master Roo hat features a crushable brim, it can be flattened and placed flat in your suitcase. Ensure the hat is laid evenly and no heavy objects are placed on the brim.

Long Term Storage

The best way to store your Master Roo hat is on a flat even surface 'brim flat'. Store in a dry area, away from direct sunlight, to ensure your hat stays in tip-top condition.

Cleaning & Maintaining your Master Roo Leather Hat

- [Brush](#) your hat using a soft haired brush to ensure your hat is free of all surplus dirt.
- Using cold water, a wet sponge and saddle soap, work soap lather into hat in circular movements.
